

SAP VIM Health Check

A 2-week diagnostic to fix the friction slowing your invoice operations.

WHAT IT IS

A focused, senior-led assessment of your SAP Vendor Invoice Management environment. We identify where workflow, auto-posting, controls, and supportability are underperforming — and produce a practical roadmap to address it.

WHO IT'S FOR

- AP and Shared Services leaders
- SAP solution owners and support managers
- Finance transformation and ERP program leaders
- Enterprises with SAP VIM already live

SYMPTOMS WE LOOK FOR

- Low first-pass and auto-posting rates
- Growing AP backlog and invoice aging
- Recurring exceptions without clear ownership
- Unstable support model or frequent incidents
- Tax processing issues

WHAT WE ASSESS

- Workflow design and routing logic
- Auto-posting and validation behavior
- Exception handling and root-cause patterns
- Controls, governance, and supportability
- Support model and ownership boundaries

DELIVERABLES

Current-state assessment · Issue map prioritized by severity · Remediation roadmap with quick wins · Executive summary · Stakeholder readout

Engagement: fixed fee from USD 14,000 · 2 weeks · remote · scope defined upfront
